

[illegible]

Three BASE options are detailed to suit the relevant Coupling arrangement. The required BASE for the SIDE & END views should be loaded to position indicated.

Diagram illustrating the operation of the padlockable hand-auto lever. The lever is shown in two positions: a retracted position (left) and an extended position (right). The lever is labeled "TO ENGAGE HAND" and "PADLOCKABLE HAND-AUTO LEVER". The diagram shows the lever pivoting around a central point. The retracted position is at an angle of 25.4° (10.00") from the vertical. The extended position is at an angle of 35° from the vertical. The maximum extension is indicated as 80° MAX. The lever has a diameter of 06.5 (1/4" Dia) and a padlock is shown engaged on the lever.
