

NOTES 1.FUSES

-PS1 is a self-resetting fuse.

-Refer to publication PUB002-039 for approved fuses FS1 and FS2. -Actuator rated voltage specified on nameplate. Voltage tolerance +/-10%, applies for rated torque performance; duty cycle is not guaranteed.

2.CONTROL:

-Supply provided on terminals 4 & 5 only available when power is applied to the actuator:

-Max external load 5W at 24Vdc / 5VA at 120Vac

-Connect motor control contactor coils in series with CT/LS S1(closed) and OT/LS

S2(open).

-Voltage applied to CT/LS & OT/LS must not exceed 120V AC or DC.

-Maximum individual switching power must not exceed 60W inductive or 150W resistive.

3.INDICATION:

-For typical position, status and alarm indication see PUB002-041.

-"S" contacts are user configurable and are shown in their default setting

Voltage applied to indication contacts must not exceed 120V AC or

Maximum individual Switching power must not exceed 60W inductive oad or 150W resistive load

Total switched current for contacts S1 to S4 must not exceed 8A, with naximum individual current of 5A.

Battery maintains local and remote "S" contact indication only.

Refer to installation manual for approved replacement battery types.

FOR FUNCTION POSITION (0-99%), MAKE OR BREAK REFERS O CONTACT STATUS AFTER TRIPPING WHEN TRAVELLING IN THE OPEN DIRECTION
